

Seamless! A complete solution provided by Martin at my accountants Larking Gowen

Before we used the all in one Receipt Bank and QuickBooks Online solution, dealing with my expenses seemed a big chore. I would ignore the task - only dealing with them when nagged by Martin.

Now that my business has grown, with increased expenses not just from me but the whole of my team, keeping on top of all the receipts is key to me knowing the financial position of my business.

Part of the solution Martin provided was to introduce a cloud bookkeeping system QuickBooks Online Plus, which allows me to check the key metrics for my business on the move, and in real time, such as who needs to pay an invoice or who I need to pay.

Fitting Receipt Bank alongside this has allowed me to upload my expenses through the mobile app as I go, saving me time and allowing me to concentrate on the other important areas of my business.

I love the simplicity of the solution provided. I record everything as I go using the mobile app and am rolling this out to all of my team to ensure that the business makes the most of the time savings, just like I have.

I would highly recommend Receipt Bank & QuickBooks Online to other business owners. It's a complete no-brainer.
